

Pcb Manufacturing

Professional PCB manufacturer in Guangdong province with facilities in the new industrial area MeiZhou city and Bao An district in Shenzhen.

KeJie Pcb Manufacturing

Profile Kejie circuits Co., Ltd, which was founded in 1999, is a high tech enterprise specializing in PCB small volume manufacture, prototype and quick turn PCB production. The Factory covers 30,000 square meters and has ability to manufacture PCB up to 20 layers such as HDI, blind & buried hole, high frequency, AI-based, high Tg. Heavy copper (50z) PCB. Current output can reach more than 2,000 square meters monthly. Including more than 2000 types quick turn prototype PCB. Kejie circuits Co., Ltd provides all kinds of quick turn prototype and small volume manufacture to different industries such as telecommunication, consumptive electronics, aviation, industrial test and control, medical equipment, power supply, research institution and national defense, etc. Layer count: single layer up to 20 layer (rigid) Base material: FR-4 High-speed & high-frequency material high Tg material AI-base Special technology: Blind hole PCB Buried Via PCB Impedance control PCB Heavy Cu PCB Surface finish: HASL, ENIG, Chem, Tin, Flash Gold, OSP, Gold finger. Application: Telecommunication, Network, Industrial control, Medical equipment, PC & periphery and much more

Kejie Circuits Co. Ltd has marketing offices in Shenzhen city to ease meetings with clients coming via Hong kong or Guangzhou and it is part of the Quataris Technologies Group taking advantage of an international team of experts in the IT field.
