

About us

Kejie circuits Co., Ltd, which was founded in 1999, is a high tech enterprise specializing in PCB small volume manufacture, prototype and quick turn PCB production. The Factory, located in MeiZhou industrial zone, covers 30,000 square meters and has ability to manufacture PCB up to 30 layers such as HDI, blind & buried hole, high frequency, Al-based, high Tg. Heavy copper (50z) PCB. Current output can reach more than 2,000 square meters monthly. Including more than 2000 types quick turn prototype PCB. Kejie Circuits Co. Ltd has also marketing offices in Shenzhen city to ease meetings with clients coming via Hong kong or Guangzhou and it is part of the Quataris Technologies Group
